EDUCATION

BE Computer Science, Vidyalankar Institute of technology, CGPA: 9.78 — 2020 - 2024
HSC, IES Junior College, Result: 84% — 2018 - 2020

SKILLS

Languages :	HTML, CSS, JavaScript, Java, C
Framework and Libraries :	React.js, Node.js, Express.js, Tailwind CSS, SASS
Database :	MongoDB, PostgreSQL
Tools :	VSCode, Figma, Git, Postman

EXPERIENCE

Software Development Engineering Intern — August 2023 - October 2023
Byteridge — *Hyderabad, India*

- Developed API methods in Node.js and documented them in Swagger for an inclusive job portal dedicated to individuals with disabilities.
- Played a pivotal role in Prisma schema implementation, enhancing data management and efficiency, and contributed to successful MSSQL to PostgreSQL database migration.
- Lead unit testing for the backend, ensuring code quality and robustness.

PROJECTS

ComfySloth 🎧 🔗
React.js, Styled Components

- Developed an e-commerce website with authentication powered by **Auth0**, payment processing via the **Stripe API**, and content management utilizing **Airtable**.
- Implemented a responsive and modular UI design using Styled Components.

TravelAdvisor 🎧 🔗
React.js, Bootstrap, MaterialUI

- Suggestions of restaurant, hotels, tourist attraction are made base on current location of device.You can search for specific location and apply filters as well.
- Integrated various third party API's from **GoogleMaps** and **RapidAPI**.

Bloodbank Management System 🎧 ▶
React.js, Node.js, PostgreSQL, AWS

- This website connects blood storage facilities to manage blood supply and demand. It also allows citizens to find and register for donation camps in their area.
- Used AWS services like RDS (**data storage**), SNS (**SMS notification**), Amplify (**Hosting**), **API Gateway** to deploy my own REST API and wrote Lambda Functions in node.js to create a **serverless** project.

ACHIEVEMENTS

- Won HackTheRunway hackathon by MLH for the best use of web monetization.
- Completed the Software Engineering Virtual Experience at JPMorgan & ChaseCo.
- Open Source contributions in Hacktoberfest and GirlScript Summer of Code.
